

Conference Call Presentation

First Quarter Ended
September 27, 2020

(Unaudited Results)

October 27, 2020

Cautionary Statement on Forward-Looking Statements

Certain statements included herein contain “forward-looking statements” within the meaning of federal securities laws about the financial condition and results of operations of the Company that are based on management’s beliefs, assumptions and expectations about our future economic performance, considering the information currently available to management. An example of such forward-looking statements include, among others, guidance pertaining to our financial outlook. The words “believe,” “may,” “could,” “will,” “should,” “would,” “anticipate,” “plan,” “estimate,” “project,” “expect,” “intend,” “seek,” “strive” and words of similar import, or the negative of such words, identify or signal the presence of forward-looking statements. These statements are not statements of historical fact, and they involve risks and uncertainties that may cause our actual results, performance or financial condition to differ materially from the expectations of future results, performance or financial condition that we express or imply in any forward-looking statement.

Factors that could contribute to such differences include, but are not limited to: the competitive nature of the textile industry and the impact of global competition; changes in the trade regulatory environment and governmental policies and legislation; the availability, sourcing and pricing of raw materials; general domestic and international economic and industry conditions in markets where the Company competes, including economic and political factors over which the Company has no control; changes in consumer spending, customer preferences, fashion trends and end uses for products; the financial condition of the Company’s customers; the loss of a significant customer or brand partner; natural disasters, industrial accidents, power or water shortages, extreme weather conditions and other disruptions at one of our facilities; the disruption of operations, global demand, or financial performance as a result of catastrophic or extraordinary events, including epidemics or pandemics such as the recent strain of coronavirus; the success of the Company’s strategic business initiatives; the volatility of financial and credit markets; the ability to service indebtedness and fund capital expenditures and strategic business initiatives; the availability of and access to credit on reasonable terms; changes in foreign currency exchange, interest and inflation rates; fluctuations in production costs; the ability to protect intellectual property; the strength and reputation of our brands; employee relations; the ability to attract, retain and motivate key employees; the impact of environmental, health and safety regulations; the impact of tax laws, the judicial or administrative interpretations of tax laws and/or changes in such laws or interpretations; the operating performance of joint ventures and other equity method investments; and the accurate financial reporting of information from equity method investees.

All such factors are difficult to predict, contain uncertainties that may materially affect actual results and may be beyond our control. New factors emerge from time to time, and it is not possible for management to predict all such factors or to assess the impact of each such factor on the Company. Any forward-looking statement speaks only as of the date on which such statement is made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made, except as may be required by federal securities laws. The above and other risks and uncertainties are described in the Company’s most recent Annual Report on Form 10-K, and additional risks or uncertainties may be described from time to time in other reports filed by the Company with the Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934, as amended.

Non-GAAP Financial Measures

Certain non-GAAP financial measures are designed to complement the financial information presented in accordance with GAAP. These non-GAAP financial measures include Earnings Before Interest, Taxes, Depreciation and Amortization (“EBITDA”), Adjusted EBITDA, Adjusted Net (Loss) Income, Adjusted EPS, Adjusted Working Capital and Net Debt (collectively, the “non-GAAP financial measures”).

- EBITDA represents Net income before net interest expense, income tax expense, and depreciation and amortization expense.
- Adjusted EBITDA represents EBITDA adjusted to exclude equity in loss of Parkdale America, LLC (“PAL”) and, from time to time, certain other adjustments necessary to understand and compare the underlying results of the Company.
- Adjusted Working Capital represents receivables plus inventory and other current assets, less accounts payable and accrued expenses, which is an indicator of the Company’s production efficiency and ability to manage its inventory and receivables.
- Net Debt represents debt principal less cash and cash equivalents.

The non-GAAP financial measures are not determined in accordance with GAAP and should not be considered a substitute for performance measures determined in accordance with GAAP. The calculations of the non-GAAP financial measures are subjective, based on management’s belief as to which items should be included or excluded in order to provide the most reasonable and comparable view of the underlying operating performance of the business. The Company may, from time to time, modify the amounts used to determine its non-GAAP financial measures.

We believe that these non-GAAP financial measures better reflect the Company’s underlying operations and performance and that their use, as operating performance measures, provides investors and analysts with a measure of operating results unaffected by differences in capital structures, capital investment cycles and ages of related assets, among otherwise comparable companies.

Management uses Adjusted EBITDA (i) as a measurement of operating performance because it assists us in comparing our operating performance on a consistent basis, as it removes the impact of (a) items directly related to our asset base (primarily depreciation and amortization) and (b) items that we would not expect to occur as a part of our normal business on a regular basis; (ii) for planning purposes, including the preparation of our annual operating budget; (iii) as a valuation measure for evaluating our operating performance and our capacity to incur and service debt, fund capital expenditures and expand our business; and (iv) as one measure in determining the value of other acquisitions and dispositions. Adjusted EBITDA is a key performance metric utilized in the determination of variable compensation. We also believe Adjusted EBITDA is an appropriate supplemental measure of debt service capacity, because it serves as a high-level proxy for cash generated from operations. Equity in loss of PAL is excluded from Adjusted EBITDA because such results do not reflect our operating performance.

Management uses Adjusted Working Capital as an indicator of the Company’s production efficiency and ability to manage inventory and receivables. In the first quarter of fiscal 2019, in connection with changes to balance sheet presentation required by the adoption of new revenue recognition guidance, the Company updated the definition of Adjusted Working Capital to include Other current assets for current and historical calculations of the non-GAAP financial measure. Other current assets includes amounts capitalized for future conversion into inventory or receivables (e.g., vendor deposits and contract assets), and management believes that its inclusion in the definition of Adjusted Working Capital improves the understanding of the Company’s capital that is supporting production and sales activity.

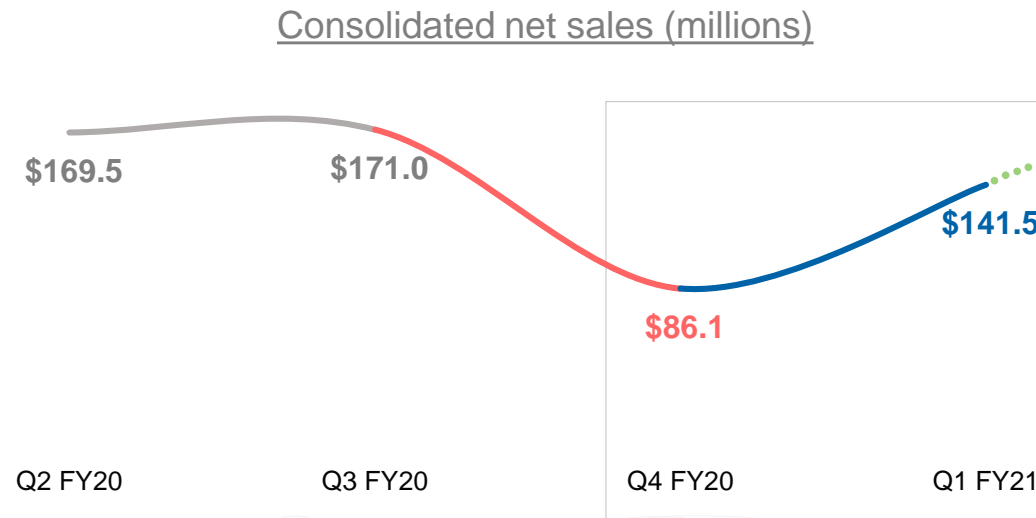

Management uses Net Debt as a liquidity and leverage metric to determine how much debt would remain if all cash and cash equivalents were used to pay down debt principal.

In evaluating non-GAAP financial measures, investors should be aware that, in the future, we may incur expenses similar to the adjustments included herein. Our presentation of non-GAAP financial measures should not be construed as indicating that our future results will be unaffected by unusual or non-recurring items. Each of our non-GAAP financial measures has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results or liquidity measures as reported under GAAP. Some of these limitations are (i) it is not adjusted for all non-cash income or expense items that are reflected in our statements of cash flows; (ii) it does not reflect the impact of earnings or charges resulting from matters we consider not indicative of our ongoing operations; (iii) it does not reflect changes in, or cash requirements for, our working capital needs; (iv) it does not reflect the cash requirements necessary to make payments on our debt; (v) it does not reflect our future requirements for capital expenditures or contractual commitments; (vi) it does not reflect limitations on or costs related to transferring earnings from our subsidiaries to us; and (vii) other companies in our industry may calculate this measure differently than we do, limiting its usefulness as a comparative measure.

Because of these limitations, these non-GAAP financial measures should not be considered as a measure of discretionary cash available to us to invest in the growth of our business or as a measure of cash that will be available to us to meet our obligations, including those under our outstanding debt obligations. You should compensate for these limitations by relying primarily on our GAAP results and using these measures only as supplemental information.

Q1 FISCAL 2021 CEO COMMENTARY

- Revenue rebounded 64% from Q4 fiscal 2020 levels
- Recovery speed by geography (strongest first)
 - Brazil – highest quarterly sales volume on record
 - Asia – effective cost management
 - North / Central America – sustainability interest grows
- Recovery speed by market (strongest first)
 - Automotive
 - Apparel
 - Furnishings
 - All other
- Momentum from new products, customer adoptions, and co-branding
- Strategic acquisition of Texturing Service LLC’s air-jet texturing business; easy to integrate into the Polyester Segment
- Current balance sheet is even stronger than at June 2020

NET SALES OVERVIEW (SEQUENTIAL QUARTER)

(dollars in thousands)

Three-Month Comparison (Q4 FY20 vs. Q1 FY21)

	<u>Q4 FY20</u>	<u>Volume Change</u>	<u>Price/Mix Change</u>	<u>FX Change ¹</u>	<u>Total Change</u>	<u>Q1 FY21</u>

BALANCE SHEET HIGHLIGHTS

(dollars in millions)

- Continued diligence around balance sheet during initial recovery stages
- Capital allocation strategy remains balanced and focused on:
 - Capital expenditures
 - Acquisitions
 - Debt reduction
 - Share repurchases

Building on Q1 2021 Momentum to Navigate the Recovery

- The initial recovery in net sales and profitability in the first quarter of fiscal 2021 appears consistent with the improvements in the apparel industry, in spite of the lingering challenges of COVID-19;
- Entering the second quarter of fiscal 2021, net sales trends are encouraging and are expected to continue to improve; should these trends remain, growth in profitability is expected to follow at commensurate rates, considering any routine seasonal net sales and expense items;
- Sales of REPREVE® and value-added products are expected to continue recent growth rates and increase as a percentage of net sales; and
- \$22.0 to \$25.0 million of capital expenditures are expected for fiscal 2021.

Thank You!
